CERTIFICATIONS

- RHCSA
- Docker & Kubernetes Hands-on

SUMMARY

DevOps Engineer with 2+ years in Linux administration, CI/CD automation, and containerized deployments. Proficient in Jenkins, GitLab CI/CD, GitHub Actions, Docker, and Bash/Python scripting. Experienced managing production RHEL/Ubuntu environments, building automated deployment pipelines, and developing monitoring stacks. Actively expanding expertise in Kubernetes and observability tools.

EXPERIENCE

Justdial Pvt. Ltd.

Linux Administrator · Bengaluru

Nov 2021 – Feb 2024 · 2.3 yrs

- Administered 50+ Linux servers (Ubuntu/CentOS/RHEL) running Nginx, MySQL, Node.js, and PHP-FPM across production and staging.
- Automated backups, log rotation, and recovery workflows using Bash and Python, eliminating manual operational overhead.
- Built and maintained Jenkins and GitLab CI/CD pipelines, cutting release cycle time by 40%.
- Tuned Nginx, PHP-FPM, and MySQL configuration, improving application response times by 30%.
- Developed monitoring dashboards and alerting scripts for real-time system health tracking and incident response.

SELECTED PROJECTS

Automated CI/CD — 2-Tier Flask Application

Flask · MongoDB · Jenkins · Docker Compose · AWS EC2 · 2Tier-Flask-App-DevOps-Project

- Containerized Flask + MongoDB app on AWS EC2 using Docker Compose with persistent volumes and health checks.
- Engineered Jenkins CI/CD pipeline to automate image builds, pushes, and zero-downtime deployments.
- Reduced deployment time from 20+ minutes to under 4 minutes through full pipeline automation.

CI/CD Pipeline Hardening

GitHub Actions · Docker · Trivy · CICD-Hardening

- Designed 7-stage pipeline: lint · test · Docker build · Trivy scan · staging · smoke test · prod promotion.
- Integrated automated rollback on health-check failure, reducing manual deployment risk to zero.
- Improved release security posture by blocking deployments with critical CVEs detected by Trivy.

Monitoring & Observability Stack

Prometheus · Grafana · Node Exporter · Docker · Prometheus-Observability-Stack

- Deployed Prometheus + Grafana + Node Exporter stack tracking 20+ system metrics in real time.
- Built interactive Grafana dashboards for CPU, memory, disk, and network health visualization.

Digital Memory Jar

Next.js · React · Node.js · Docker · GitHub Actions · Digital-MemoryJar

- Built full-stack AI journaling app with emotion analysis and mood-aware recommendations.
- Automated Docker builds and deployments via GitHub Actions, cutting release time from 15 mins to under 3 mins.
