

Sagar Parab

LINUX ADMINISTRATOR | WEB DEVELOPMENT EXPERIENCE

Bengaluru, India | sgrp9801@gmail.com | +91 8956002275 | github.com/eagar1089 | LinkedIn | Portfolio

Professional Summary

Linux Administrator with more than two years of experience supporting production and staging environments. Hands-on with RHEL, Ubuntu, CentOS, Nginx, PHP-FPM, MySQL, Bash, Python, monitoring, backups, logs, permissions, and operational troubleshooting. Web development experience includes PHP, JavaScript, React, Next.js, Flask, Node.js, APIs, databases, and deployment of applications on Linux servers.

Technical Skills

Linux Administration: RHEL, Ubuntu, CentOS, users, permissions, services, logs	Web Development: PHP, JavaScript, React, Next.js, Flask, Node.js
Linux and Web: RHEL, Ubuntu, CentOS, Nginx, PHP-FPM, MySQL, Node.js	Monitoring: Prometheus, Grafana, Node Exporter, service health
Automation: Bash, Python, backups, logs, deployment scripting	Development: PHP, JavaScript, React, Next.js, Flask, MongoDB, Git
Application Delivery: Docker, GitHub Actions, Jenkins, GitLab pipelines	Practices: Incident support, observability, least privilege, documentation

Professional Experience

Justdial Pvt. Ltd. - Linux Administrator Bengaluru, India Linux administration and web development responsibilities	Jul 2026 - Present Nov 2021 - Feb 2024
---	--

- Administer Linux application environments across Ubuntu, CentOS, and RHEL, supporting Nginx, MySQL, Node.js, and PHP-FPM services in production and staging.
- Automate backups, log rotation, recovery, and recurring operational workflows with Bash and Python to reduce manual administration.
- Support Jenkins, GitLab, and GitHub Actions workflows used for repeatable application build, validation, and deployment processes.
- Tune and troubleshoot Nginx, PHP-FPM, MySQL, permissions, logs, and application services during deployment and incident resolution.
- Develop internal monitoring and web tools, including the current Distributed Cron Monitoring Platform and earlier F5 LiveOps, Server Inventory, and Infrastructure Data Collector projects.
- Collaborate with development teams to diagnose production issues and connect application behavior with operating-system, network, and service-level evidence.

Selected Systems and Web Projects

2-Tier Flask Web Application Flask, MongoDB, Jenkins, Docker Compose, AWS EC2 - Containerized a two-tier application with persistent storage and health checks, then automated image build and deployment through Jenkins. - Reduced a 20+ minute manual deployment process to under 4 minutes through pipeline automation.	Application Delivery Hardening GitHub Actions, Docker, Trivy - Designed a seven-stage workflow covering linting, tests, image build, vulnerability scanning, staging, smoke tests, and production promotion. - Added health-check rollback and blocked deployment when critical container vulnerabilities were detected.
Monitoring and Observability Stack Prometheus, Grafana, Node Exporter, Docker Deployed a containerized monitoring stack and dashboards for CPU, memory, disk, network, and service-health visibility.	Digital Memory Jar Next.js, React, Node.js, Docker, GitHub Actions Built a full-stack journaling application and automated its Docker build and delivery workflow with GitHub Actions.

Education and Certifications

B.E. Computer Engineering - University of Mumbai Jul 2023 - May 2026 GPA: 7.5	Certifications RHCSA; Docker and Kubernetes Hands-on
Diploma in Computer Engineering - University of Mumbai 2019 - 2021 86.8%	Focus: SDLC automation, containers, monitoring, incident response, deployment security, and infrastructure automation.
